

FACE SHIELD WITH HEADBAND

PRODUCT DESCRIPTION

The Face Shield with Headband has been developed to be used by frontline personnel in health care settings, essential supply chain, sanitary work, police force etc. When used properly, the product acts as a barrier between infectious material and the user's face. It covers almost the entire face of the user including the entry points viz, skin, mouth, nose and eyes. It provides protection against splatter of bodily fluids and contaminants. This is an essential product to control transmissions in community settings.

DESIGN CONSIDERATION

The Face Shield with Headband essentially consists of two components, the frame and the visor. It has been developed by considering health care PPE parameters.

- **Frame**

The plastic frame is designed to be flexible and self-constraint with minimum pressure load to fit into the head. There is provision to optionally use a rope/band along with the product. There are two variants of the frame to suit customer preference.

Variants:

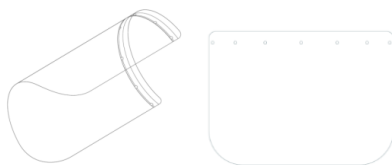

➤ Code: Elja 222
Size: 218*188*10mm

Code: Elja 444
Size: 212.5*188.5*10mm

Material : Polypropylene
Colour : Standard colours
Usage : Can be reused after proper sterilization.

- **Visor**

The visor is common for both the variants of frames.

Size : 323x235x0.2mm
Material : Poly Ethylene Terephthalate (PET)
Usage: Can be reused after sterilization or replaced depending on requirement

SALES

Category A - 1000 Nos, 2500 Nos, 5000 Nos
